

Data Privacy Compliance Service

At Simor Global, we understand the critical importance of data privacy compliance in today's interconnected world. Our team of legal experts specializes in providing comprehensive privacy compliance services to help organizations meet data protection regulations and safeguard individuals' privacy rights.

Our Privacy Compliance Services encompass a wide range of solutions designed to ensure your organization meets its legal obligations and maintains the trust of its stakeholders.

The Data Privacy Compliance service includes the following actions:

1

Situation Assessment

- Interviews with stakeholders to gather information on expectations and requirements.
- Review of existing IT and data systems.
- Compliance analysis with relevant data protection laws.
- Report describing readiness and recommendations for advancement.

2

Policy Drafting

- Examination of existing policies and relevant regulations.
- Development of governance frameworks for AI, Privacy, and/or Cybersecurity, and data privacy guidelines.
- Ethical standards development for the implementation of AI, Privacy, and/or Cybersecurity.
- Collaboration with stakeholders for policy refinement and approval.

3

Online Training

- Self-directed learning materials covering company concepts and policies.
- Interactive webinars for increased engagement and question and answer sessions.
- Assessments to certify understanding and compliance.

Data Privacy Compliance Service

4

In-person Training

- Live demonstrations and practical exercises.
- Group discussions to explore real-world applications and scenarios.
- Skill-specific training for targeted skill development.

5

Executive Leadership Training Sessions

- Sessions on implementing AI, Privacy, and/or Cybersecurity policies, strategic impact, risk management, and innovation opportunities.
- Discussions on leadership through transformation and change management in AI, Privacy, and/or Cybersecurity.

6

Legal and Implementation Recommendations

- Analysis of legal requirements for the adoption of AI, Privacy, and/or Cybersecurity.
- Recommendations for legal compliance.
- Strategies for incorporating AI, Privacy, and/or Cybersecurity considerations into due diligence, onboarding, and contractual negotiations.

7

Ongoing Consultation

- Direct access to senior advisors or project leaders for specialized guidance.
- Strategy sessions to address emerging challenges.
- Support for advanced problem resolution and innovation exploration.

Partner with Simor Global to ensure your organization complies with privacy laws and regulations while maintaining the highest standards of data protection and privacy.
